Dan Thanh **Ngu**

Informatic student at **UiO**

Profile

I am a cheerful and hardworking student with a creative mind at UiO, studying programming and system architecture. Through my studies I have developed strong skills in teamwork and agile development, and gained experience with designing, implementing and testing software solutions. I enjoy learning new technologies and solving technical challenges in a structured and creative way.

Hobbies

- *Climbing:* regularly climb indoors and I appreciate activities that require focus.
- *Embroidering:* enjoy creative, detail-oriented work and working with my hands.
- *Playing games:* interested in challenging, story-driven games such as *Nine Sols* and *Silksong*, and in how game mechanics and world-building are designed.

Work Experience

On-call Postal Worker at *Posten Norge AS* **2019.04–pres.**
◇ Handled and sorted large volumes of mail at a high pace to ensure correct and efficient distribution.

Grader at UiO at *University of Oslo* **2026.10-pres.**
◇ I grade manditory exercieses in a course called IN1000 at UiO

Education

Master in Programming and System Architecture. Department of Informatics. *University of Oslo (UiO).* **2025–pres**
◇ Worked with programming, data handling and modelling, including developing and evaluating software solutions.

Bachelor in Programming and System Architecture. Department of Informatics. *University of Oslo (UiO).* **2022–2025**
◇ Coursework in algorithms and data structures, software development, database systems and system architecture.

Art, Design and Architecture. *Elvebakken VGS.* **2019–2022**
◇ Studied arts, design and architecture

Projects

Master Thesis Department of Informatics. *University of Oslo (UiO).*
◇ Thesis title: *Gamification in Environmental Volunteering* **2026–pres**
◇ Exploring how game-based elements can increase engagement in environmental volunteering, using user experience design, motivation theory and quantitative analysis of user behaviour and participation data.

Personal Website **2026–pres**
◇ Developed a personal website to present my projects and background, using HTML, CSS and JavaScript (and Git for version control).
◇ Check it out! Thanh's website

Badeturisten *University of Oslo (UiO).* **2024**
◇ Developed an application that shows temperature and water quality for bathing spots in Oslo, fetching and presenting data from public APIs.

Programming languages

◇ Java, Python, Kotlin, SQL, JavaScript, React, React native HTML
◇ CSS and C

Skillset

◇ Broad experience with implementing efficient solutions for search, sorting and graph algorithms.
◇ I am comfortable evaluating program efficiency and runtime.
◇ A solid understanding of agile development methods, including their advantages and disadvantages.
◇ Experience with requirements gathering and analysis, design, programming, testing, maintenance and further development of software systems.
◇ I'm familiar with methods and principles for built-in security and universal design (accessibility).
◇ I'm able to design and validate data models and implement them as relational databases.
